

Iconal Technology carries out contract research and consultancy in new and emerging technologies for security. We work with government clients in the UK, Europe and the USA carrying out early-stage research and providing independent, science-based analysis and advice.

We currently have several projects where we are investigating novel detection techniques and are looking for one or two students to work with us over the summer period. The work would suit engineering, physical or mathematical science students (both theoretical and practical) and may involve both experimental work and data analysis.

We are looking for:

- Keen, innovative, self-motivated individuals
- Interested in practical application of science, maths & engineering
 - Able to understand impact of “real world” constraints, challenges etc.
- Confident, articulate communicators
- Good familiarity with Python, Matlab or similar.
- All levels of experience welcome: Undergraduate to PhD+
- Ideally at least 8 weeks available over the summer break.

Salary, benefits and location

We offer a competitive salary. The roles will be based in Cambridge.

How to apply

Please send a CV and a covering letter to careers@iconal.com

If you have any questions before applying, please also send them to the above address.
