

Iconal Technology carries out contract research and consultancy in new and emerging technologies for security. We work with government clients in the UK, Europe and the USA carrying out early-stage research and providing independent, science-based analysis and advice.

We are growing our core team based in Cambridge and are looking for graduates and postgraduates to join us as **Consultants** – with or working towards a degree in a technical discipline, ideally with at least a year's post-graduation experience in industry or government.

This role will involve elements of hands-on scientific experimentation, technical R&D, data analysis, technology forecasts and fore-sighting studies, laboratory and field test & evaluation of new and emerging technology.

You are an innovative thinker with keen technical skills and a desire to gain experience in industry and develop domain knowledge in a challenging technical area. You will be flexible, adaptable, highly self-motivated and enjoy creating novel solutions to complex challenges.

Required skills

Essential

- Graduate or postgraduate level qualification in a technical discipline
- Solid understanding of physical principles.
- Innovative hands-on attitude to experimentation and problem-solving
- Ability to communicate technical concepts and the value of your work clearly and confidently

Highly Desirable

- Self-motivated, capable of independent research and using keen technical insight to drive the direction of research.
- Ability to manage and build relationships with customers.
- Experience in technology/product development for commercial applications.
- Experience or potential for project leadership.
- Hobbies or pastimes which demonstrate a flair for creativity and innovation.

Experience in homeland security or related areas not essential - an excellent candidate will be able to pick this up quickly, however we are keen to hear of any relevant background which may support your application.

Salary, benefits and location

We offer competitive salary, pension and benefits. The roles will be based in Cambridge, with options for flexible working.

How to apply

Please send a CV and a covering letter to careers@iconal.com

If you have any questions before applying, please also send them to the above address.
